The Patent Office was established at the Railway Offices (second floor), Flinders-street, Melbourne, in the State of Victoria, as from the 29th day of October, 1909.

Provisional Regulations under the Patents Acts 1903 and 1906 are advertised on pages 38, 582, and 1384 of the *Commonwealth of Australia Gazette* for 1909.

The Receipts and Expenditure of the Patent Office are published in the Quarterly and Annual Statement, pages 56-101, 990-1036, 1387-1431, and 1618-1659 of the *Commonwealth of Australia Gazette* for 1909.

List of Volumes and Directions for Collating when Binding.

The issues of *The Australian Official Journal of Patents* for each year comprise several portions which may be bound separately; the completion of each volume will be notified in the *Journal*.

I. Weekly advertisements of *Applications and Proceedings*, with *Illustrated Notes* of Complete Specifications advertised as accepted. The issues are numbered and paged consecutively; the last number for the year contains notices up to the end of December, and is usually issued in the first week of January following; a Title Sheet with a Miscellaneous Index is issued (paged in roman numerals) shortly afterwards, completing the volume, which usually receives an *even* volume-number.

Vol. 2, 1905, xii + 778 pages; 50 Nos.

Vol. 4, 1906, viii + 678 pages; 52 Nos.

Vol. 6, 1907, viii + 848 pages; 50 Nos.

Vol. 8, 1908, viii + 860 pages; 49 Nos.

Vol. 10, 1909, viii + 1124 pages; 50 Nos.

Vol. 12 for 1910, in progress.

II. Annual *Statistics and Indexes* to Commonwealth and State applications and proceedings for the preceding year. Each part of the Indexes is issued in a green cover as soon as possible after compilation; the Parts have distinguishing letters on the covers, indicating the order of binding; Part A, containing the Statistics, is not necessarily the first part to be issued. This volume will usually receive an *odd* volume-number.

Vol. 1, 1904, xvi + 280 pages; 1 part.

Vol. 3, 1905, xvi + 576 pages; 7 parts.

Vol. 5, 1906, xxiv + 634 pages; 6 parts.

Vol. 7, 1907, xxxii + 276 pages; 5 parts.

Vol. 9, 1908, xxiv + 262 pages; 5 parts.

Vol. 11, 1909, lxviii + 282 pages; 5 parts.

Part A, Statistics	Now issued.
" B, Names	Issued 15 Feb., 1910
" C, Classification	" 22 Feb., 1910
" D, Numerical	" 10 May, 1910
" E, States Proceedings	" 19 July, 1910

III. The *Monthly Indexes* to Commonwealth Applications, for names and subject matter, are issued in the same cover as the weekly portion. As these indexes are for temporary use, and will be consolidated in the Annual Index volume issued early in the following year, they need not be bound in the *even* numbered volume. If it is desired to preserve them, they are continuously paged, and may be bound separately.

IV. *Illustrated Abridgments* of Accepted Specifications are issued in sections of 16 pages in the same cover as the weekly portions. It is impracticable to make these correspond with the Calendar Year; they are to be detached from the proceedings and bound separately when complete. The sections are paged continuously at the foot. Sections A to Z for 1905 have been issued, containing 416 pages up to Application No. 3677, 21 July.

From January, 1909, *Illustrated Notes* have been issued in the *Journal* simultaneously with the notice of acceptance.

STATES STATISTICS.

Annual Progress of Applications, 1847 to 1905.

The following table gives the numbers allotted in the several States of the Commonwealth to the last applications under the State Laws in each year, with the exception of some delayed cases which received numbers later than the earliest applications for the following year; the differences of successive years give the approximate number of cases in each year.

When two series of chronological numbers have been used the earlier series is printed in italics; the division of these sections occurs in New South Wales after No. 2137, old series, in July, 1887, No. 1 of the new series being dated 1st August, 1887; in Victoria, the division is at the end of 1856; in Queensland, at the end of 1884; in South Australia, at No. 321, dated 11th December, 1877, but three of the Private Acts for Patents of Monopoly in Manufactures (prior to 1859) are not numbered in the Volumes of Specifications printed by the State, and several applications dated in 1878 also received numbers in the old series; in Western Australia and Tasmania only one chronological series was used. Sometimes a second set of numbers has been used for the Grants of Patents, as distinguished from applications, and in such cases the number of the Grant is also given; the letters "N.R." (*not registered*) following an application indicate that no grant was made on that application.

1904	...	21,427

Owing to irregularities of numbering, more particularly in the earlier years, the estimated total of 64,401 entries does not exactly represent the total applications, there being a small percentage of numbers allotted to assignments, &c., and it is estimated that only about 40,000 separate inventions are represented, many applications being recorded in several or all of the States.

An analysis of the State applications for 1904-5 (total number, 716) show that they relate to 395 inventions, of which 56 were also the subject of applications in some States on dates earlier than 1904; a few of these inventions are also the subject of Commonwealth applications under section 29, and under later procedure.

Between 13th February and 31st May, 1904, there were 756 applications under section 29 of the *Patents Act* 1903, which were lodged contemporaneously with the foregoing State applications of 1904. Subsequent to the proclamation of the *Patents Act* 1903, five applications were received during 1904 and 1905, pursuant to sections 6 and 8 of the *Patents Act* 1903.

Surrenders of State Patents.

Under section 7, sub-section 4, nine State grants have been surrendered by the patentees of two grants in the Commonwealth.

Renewal of State Patents.

In all States except New South Wales, the Letters Patent are subject to the payment of renewal fees at various times during the currency of the statutory period of 14 years. The following table gives the number of patents granted and unexpired in New South Wales from 1896, and the number granted in other States, with the number on which renewal fees due up to 31st December, 1909, have been paid, or on which the period for the payment of the renewal fee had not expired:—

4A.—(1.) On and after a date to be fixed by proclamation, this Act shall apply to the Territory of Papua as if that Territory were part of the Commonwealth, and no application for a patent under any Patent law (other than this Act) applying to that Territory shall be receivable except pursuant to some right previously acquired.

(2.) For the purposes of the application of this Act to the Territory of Papua, any reference in this Act to the Commonwealth or to Australia shall be deemed to include a reference to the Territory of Papua.

(3.) Nothing in this section shall affect—

- (a) any application for a patent lodged at the Patent Office prior to the date fixed by proclamation under this section, or any patent granted on any application so lodged, or
- (b) any application for a patent lodged or made in Papua prior to the said date, or any patent granted on any application so lodged or made.

Provision where

adequate extent
in the
Commonwealth.

Inserted by
No. 17, 1909,
s. 15.

37A.—(1.) At any time not less than four years after the date of a patent, and not less than two years after the commencement of this section, any person may apply to the High Court or the Supreme Court for an order declaring that the patented article or process is not manufactured or carried on to an adequate extent in the Commonwealth.

(2.) If, on the hearing of the application, the Court is satisfied that the patented article or process is manufactured or carried on exclusively or mainly outside the Commonwealth, then, subject to the provision of this section, and unless the patentee proves that the article or process is manufactured or carried on to an adequate extent in the Commonwealth, or gives satisfactory reasons why the article or process is not so manufactured or carried on, it shall make the order applied for, to take effect either—

(a) forthwith; or

(b) at the expiration of such reasonable time as is specified in the order, unless in the meantime it is shown to the satisfaction of the Court that the patented article or process is manufactured or carried on to an adequate extent in the Commonwealth:

Provided that no such order shall be made which is at variance with any treaty, convention, arrangement, or engagement with any foreign country or part of the King's Dominions.

(3.) If, within the time specified in the order, the patented article or process is not manufactured or carried on to an adequate extent in the Commonwealth, but the patentee gives satisfactory reasons why it is not so manufactured or carried on, the Court may make a further order extending the time so specified for any specified time not exceeding twelve months.

(4.) From and after the time when an order under sub-section (2.) of this section takes effect, the patent shall not be deemed to be infringed by the manufacture or carrying on in the Commonwealth of the patented article or process, or by the vending within the Commonwealth of the patented article made within the Commonwealth.

(5.) If at any time after the making of an order under sub-section (2.) of this section the Court is satisfied that the patented article or process is not manufactured or carried on in the Commonwealth by any other person than the patentee, and that the patentee is manufacturing it or carrying it on to an adequate extent in the Commonwealth, the Court may in its discretion, if it thinks it just so to do, revoke the order, which shall thenceforth cease to have effect.

(6.) In any case in which the Court is empowered by this section to make an order under sub-section (2.) thereof, it may, in its discretion, if it thinks it just so to do, instead of making such an order, order the patentee to grant a compulsory licence to the applicant on such terms as the Court thinks just.

(7.) In any proceedings under this section the Court may make such order as to costs as it thinks just, and may order the applicant to give such security as it thinks just for the costs of the proceedings and of any appeal therefrom, and, in default of such security being given within the time specified by the order, the proceedings or appeal shall be deemed to be abandoned.

Avoidance of certain conditions attached to the sale, &c., of patented articles.

7 Edw. 7, c. 29, s. 38.

Inserted by No. 17, 1909, s. 15.

87B.—(1.) It shall not be lawful, in any contract made after the commencement of this section in relation to the sale or lease of, or licence to use or work, any article or process protected by a patent, to insert a condition, the effect of which would be—

- (a) to prohibit or restrict the purchaser, lessee, or licensee from using any article or class of articles or process, whether patented or not, supplied or owned by any person other than the seller, lessor, or licensor, or his nominees; or
- (b) to require the purchaser, lessee, or licensee to acquire from the seller, lessor, or licensor, or his nominees, any article or class of articles not protected by the patent;

and any such condition shall be null and void.

Provided that this sub-section shall not apply if—

- (i.) the seller, lessor, or licensor proves that, at the time the contract was entered into, the purchaser, lessee, or licensee had the option of purchasing the article or obtaining a lease or licence on reasonable terms, without any such condition; and
- (ii.) the contract entitles the purchaser, lessee, or licensee to relieve himself of his liability to observe any such condition on giving the other party three months' notice in writing, and on payment in compensation for such relief in the case of a purchase of such sum, or in the case of a lease or licence of such rent or royalty for the residue of the term of the contract, as may be fixed by an arbitrator appointed by the Minister.

(2.) Any contract relating to the lease of or licence to use or work any patented article or patented process, whether made before or after the commencement of this section, may at any time after the patent or all the patents by which the article or process was protected at the time of the making of the contract has or have ceased to be in force, and notwithstanding anything in the same or in any other contract to the contrary, be determined by either party on giving three months' notice in writing to the other party.

(3.) Any contract made before the commencement of this section, relating to the lease of or licence to use or work any patented article or process, and containing any condition which, had the contract been made after the commencement of this section, would by virtue of this section have been null and void, may, at any time before the contract is determinable under the last preceding sub-section, and notwithstanding anything in the same or any other contract to the contrary, be determined by either party on giving three months' notice in writing to the other party.

(4.) Where under either of the two last preceding sub-sections any notice is given determining a contract made before the commencement of this section, the party giving the notice shall be liable to pay such compensation as, failing agreement, may be awarded by an arbitrator appointed by the Minister.

(5.) The insertion by the patentee in a contract, made after the commencement of this section, of any condition which by virtue of this section is null and void, shall be available as a defence to an action for infringement of the patent, to which the contract relates, brought while that contract is in force.

(6.) Nothing in this section shall—

- (a) affect any condition in a contract whereby a person is prohibited from selling any goods other than those of a particular person ; or
- (b) be construed as validating any contract which would, apart from this section be invalid ; or
- (c) affect any right of determining a contract or condition in a contract exercisable independently of this section ; or
- (d) affect any condition in a contract for the lease of or licence to use a patented article, whereby the lessor or licensor reserves to himself or his nominees the right to supply such new parts of the patented article as may be required to put or keep it in repair.

Provided that such application shall be made within twelve months from such person applying for protection in the United Kingdom or the Isle of Man or the foreign State with which the arrangement is in force :

Provided also that nothing in this section contained shall entitle the patentee to recover damages for infringements happening prior to the date of the actual acceptance of his complete specification in the Commonwealth.

(2.) The publication in the Commonwealth during the respective periods aforesaid of any description of the invention or the use therein during such periods of the invention shall not invalidate the patent which may be granted for the invention.

(3.) The application for the grant of a patent under this section must be made in the same manner as an ordinary application under this Act.

(4.) The provisions of this section shall in the case of foreign States apply only in the case of those foreign States with respect to which His Majesty by Order in Council has before or after the commencement of this Act declared the provisions of the aforesaid section one hundred and three of the said first recited Imperial Act to be applicable, and so long only in the case of each such State as the order continues in force with respect to that State.

(2.) An order under this section shall, from a date to be mentioned for the purpose in the order, take effect as if its provisions had been contained in this Act, but it shall be lawful for the Governor-General to revoke any such order.

123.—(1.) A patent shall not prevent the use, within the territorial waters of the Commonwealth, of an invention for the purposes of the navigation or working of a British vessel registered at a port or place outside the Commonwealth or of a foreign vessel or the use of an invention in any such vessel within those waters, provided it is not used therein for or in connexion with the manufacture or preparation of anything intended to be sold in or exported from the Commonwealth.

(2.) But this section shall not extend to vessels of any British possession or foreign State of which the laws authorize subjects of such possession or State having patents or like privileges for the exclusive use or exercise of inventions within its territories to prevent or interfere with the use of such inventions in British vessels while in the port of such possession or State or in the waters within the jurisdiction of its Courts where such inventions are not so used for the manufacture or preparation of anything intended to be sold in or exported from the territories of such possession or State.

Exhibit at
exhibition, &c.

124. The fact that an invention has been exhibited or tested either publicly or privately shall not in itself be deemed a ground for refusing a patent.

Provided that any public exhibition or testing must have been within one year of the date of the inventor lodging his application for a patent.

125. It shall be the duty of all patentees and their assigns and legal representatives and of all persons making or vending any patented article for or under them to give sufficient notice to the public that the same is patented, either by fixing thereon the word "patented" together with the day and year the patent was granted and the number of the patent; or when from the character of the article this cannot be done, by fixing to it or to the package wherein one or more of them is enclosed a label containing the like notice; and in any suit for infringement by the party failing so to mark no damages shall be recovered by the plaintiff, except on proof that the defendant was duly notified of the infringement, and continued after such notice to make, use, or vend the article so patented.

Subject Classification

(ARRANGED THEMATICALLY).

Very few inventions are confined strictly to one class of subject-matter, whilst many inventions may be applicable to quite a large number of different manufactures; hence the total number of entries in the classified lists is much greater than the number of applications for patents.

The system of classification is described on pages 79 to 157 of Vol. 3, and the classified lists of subject-matter for the applications of 1904 to 1909 will be found in the Index Volumes (*odd* numbered) for the several years.

Abridgments of Specifications.

The notification of the acceptance of each Complete Specification for 1904 was accompanied by a *brief* account of the invention; these could not be arranged numerically in the weekly issues of the *Journal*, but a numerically arranged index was issued as a prefix to the publication of *Illustrated Abridgments* of accepted specifications, which are arranged in numerical order commencing with the Applications for 1905 from No. 2245. Twenty-six sections have been issued to February, 1908, as supplements to the *Journal*, and are arranged for future continuous binding in annual volumes.

Illustrated Notes.

The *Journal* from January, 1909, contains brief *Illustrated Notes* of the accepted specifications advertised in each issue as open to public inspection. This section of the *Journal* is designed to supply the public with selected pictorial illustration of each accepted invention simultaneously with the advertisement of its acceptance, to avoid the delay of many months necessary to collect the series of *Illustrated Abridgments* in complete numerical order.

Inspection of Official Journal.

List of places receiving the *Australian Official Journal of Patents*, including the *Australian Abridgments* of published specifications, and annual volumes of *Statistics and Indexes*. The *Journals* are transmitted by first post after publication in Melbourne, and are available for public reference free of charge during customary office hours.

Principals of libraries and institutions who desire files of the *Journal* for public use, should apply to "The Commissioner, Department of Patents, Melbourne," stating the population of the surrounding district and giving an undertaking that the public will have free access to the copies, and that they will be preserved and bound on the completion of each volume.

Copies will also be sent *in exchange* to editors of approved technical periodicals, and to mechanical and scientific societies who will undertake to preserve the completed file for reference. The periodicals sent in exchange will be preserved in the public library of the Commonwealth Patent Office.

(Free to Subscribers to the Official Journal for 1910.)

ISSUED 15TH FEBRUARY, 1910.

By Authority:

J. KEMP, GOVERNMENT PRINTER, MELBOURNE.

COMMONWEALTH NAME INDEX,

INCLUDING THE NAMES OF ACTUAL INVENTORS, APPLICANTS, AND OTHER PERSONS OR CORPORATIONS NOTED DURING 1909 IN APPLICATIONS AND PROCEEDINGS UNDER THE "PATENTS ACT 1903."

4th JANUARY TO 31st DECEMBER, 1909.

This index is consolidated from the monthly parts issued with Vol. 10.

When the applicant is an agent or a corporation, the surname of an actual inventor, assignor, or communicator is added in parentheses, such other names being also indexed under their proper letters.

When fresh names occur in notices of proceedings subsequent to the application, the words *assignee, opponent, licensee, &c.*, are added in italics, to indicate the nature of their interest in the application.

The abbreviated titles in the second column should not be regarded as completely descriptive of the invention.

The letter "P" prefixed to a number indicates that the application was accompanied by a Provisional Specification; other numbers are applications with Complete Specifications.

The full particulars of names, addresses, &c., may be found in numerical order by reference to the *Journal* under notices of Applications Received.

INDEXES, 1909.

PART C.—COMMONWEALTH SUBJECT INDEX
(ARRANGED IN CLASSES.)

(Free to Subscribers to the Official Journal for 1910.)

ISSUED 22ND FEBRUARY, 1910.

By Authority :

J. KEMP, GOVERNMENT PRINTER, MELBOURNE.

CLASSIFIED SUBJECT INDEX TO SPECIFICATIONS LODGED.

4th JANUARY to 31st DECEMBER, 1909.

APPLICATIONS Nos. 13,422 TO 16,730,
AND COMPLETE SPECIFICATIONS LODGED IN 1909, FOLLOWING APPLICATIONS OF 1908.

The system of classification is described in Vol. 3, Part D, obtainable from the Government Printing Office, Melbourne, price One shilling, post free.

This Consolidated Index contains the preliminary information previously issued as Monthly Supplements to the *Journal*, Vol. 8. Revised indexes with more particular information are in preparation, and will be issued in advance sections as the specifications are published, and in consolidated form with the volumes of Illustrated Abridgments.

The entries have been prepared from a preliminary inspection of the documents, and have been compiled mainly from the applicants' titles, for the full wording of which reference must be made to the *Journal*, under notices of Applications Received.

The surname following the title is that of an actual inventor (or applicant), and is given to facilitate the discrimination of inventions having closely-related titles. The full particulars of names, addresses, &c., may be found by reference to the *Journal* under notices of Applications Received.

The letter "P." prefixed to a number indicates that the application was accompanied by a Provisional Specification; other numbers are Complete Specifications.

INSTRUCTIONS TO SEARCHERS.

To find the lists of inventions in which they are interested, searchers should first look for the most nearly relating groups in the Thematic Table (Vol. 3, page 82), and then refer to the Numerical Subject Lists in those groups, where either the desired detail or some direct clue to similar subject-matter will be indicated in one or more of the classes; inventions relating to the desired subject-matter will be found in the Classified Indexes under those class numbers.

The numbers stated in parentheses after the title indicate that the Specification contains details relating to other classes, and search should also be made in those lists for portions of other inventions which may have relation to the matter under consideration.

In cases of difficulty, reference may be made in the Word Index (Vol. 3, page 131) to names describing subject-matter; but the copious and diverse orthography of the English language makes it impossible to include every synonym in an alphabetical list of moderate dimensions.

Reference may also be made to the series of Alphabetical Subject Indexes in Vols. 1, 3, and 5.
